## ABOUT ME

A passionate Information Systems student with hands-on experience in JavaScript, TypeScript, and popular frameworks like ReactJS and NextJS. I have developed real-world projects such as a sports field booking website, an event web platform, and two organization websites using ReactJS and NextJS frameworks and WordPress. I am eager to contribute to innovative tech teams and grow my web development expertise.

## EDUCATION

**State Islamic University Syarif Hidayatullah  
Jakarta**

**Jakarta, Indonesia**

*Information System (GPA: 3.68)*

*August 2022 - Present*

- Member of GDSC UIN Jakarta 2022

## EXPERIENCES

**Super Project Connexion**

**Jakarta, Indonesia**

*Front-End Developer*

*May 2024 - Present*

*Tech Stack: NextJS, TypeScript, TailwindCSS, React Query, ShadcnUI*

- Collaborated closely with UI/UX designers to translate Figma mockups into responsive and interactive components, creating over 19 mobile-friendly components. Utilized Tailwind CSS for styling and ShadcnUI as the UI component library.
- Developed essential features such as filtering, searching, infinite scroll, and sports field booking functionality for a dynamic web platform using NextJS and TypeScript—Improved user experience by leveraging useSearchParams and optimizing data fetching with React Query.
- Integrated REST APIs into the front end using Axios and React Query. Leveraged React Query's caching capabilities to optimize performance, significantly reducing load times and improving application efficiency.

**TEDxUINJAKARTA**

**Jakarta, Indonesia**

*Web Developer*

*December 2023 - May 2024*

*Tech Stack: ReactJS, Axios, CSS*

[Certificate Link](#)

- Led the API integration using Axios, connecting the dashboard to the main website, facilitating seamless user interaction, and supporting 100+ ticket sales.
- Developed a responsive event web platform using ReactJS, ensuring optimal user experience across devices and browsers.

**Foreign Policy Community Indonesia**

**Jakarta, Indonesia**

*Web Developer in part of the Media Communication Division*

*December 2023 - May 2024*

*Tech Stack: WordPress*

[Certificate Link](#)

- Designed the organization's website using Figma, encompassing 8 pages and 30+ components.
- Implemented the responsive design from mockups using Elementor.
- Developed the organization's website using WordPress, integrating plugins for seamless content management and publishing foreign policy articles.
- Worked closely with the media communication team to ensure the website aligned with branding and user expectations.

### **Mini Club Developer**

**Jakarta, Indonesia**

*Front-End Developer (Training Internship)*

*November 2022 - January 2023*

*Tech Stack: ReactJS, CSS, Bootstrap*

- Developed a website visited by 100+ users for the Information Systems Student Association, transforming UI designs into fully functioning web pages with ReactJS, Bootstrap, and CSS.
- Ensured consistency and responsiveness across devices, aligning with modern web development standards.

## **SKILLS**

---

- |                          |                  |
|--------------------------|------------------|
| ▪ NextJS                 | ▪ Vercel         |
| ▪ ReactJS                | ▪ Git and GitHub |
| ▪ JavaScript             | ▪ ShadcnUI       |
| ▪ TypeScript             | ▪ HTML           |
| ▪ Responsive Development | ▪ CSS            |
| ▪ TailwindCSS            | ▪ Elementor      |
|                          | ▪ Figma          |
